You unlock this door with the key of your password.

Beyond it is a database:
- a database of SSNs,
- a database of student grades,
- a database of medical records.

You're moving into data regulated by federal, state and local policies, with names, birth dates and IDs.

You've just crossed over into

**The PII Zone**

If you work with Personally Identifiable Information (PII), you must protect it. Don’t give others unauthorized access to it by sharing your password. Learn alternatives to password sharing at:
